

A 4-bridle design with short wings, which makes it an ideal net for handling the toughest ocean-floor conditions and is easily handled with or without a net drum.

Features

- Short wings for easy handling.
- Radial arrangement distributes tension onto every mesh throughout fishing operations, hauling, and setting.
- Constructed using high-grade nylon and polyethylene netting which allows for greater durability and strength.
- Rugged net with rigid shape.

Horsepower	Design Dimensions	
	@ transducer (fm)	@ transducer (m)
2,000	33 x 33	60 x 60
3,000	38 x 38	70 x 70
4,000	46.5 x 46.5	85 x 85
5,000	55 x 55	100 x 100
6,000	65.5 x 65.5	120 x 120

Note: Numbers are approximate and based on the use of the appropriate doors, buoyancy, weight, and rigging.
